**Subject:** Pteropod data from 2016 cruises

Hi Jan, Dick and Simone,  
Recently on a phone call with Region 10, they inquired about whether there was any new pteropod data available yet from summer of 2016.  
They asked if I would touch base with you on this. We are just curious of the timeline for the next set of data from last summer.

In addition, the public comment period has been extended to 4/3/2017 for public comments on Oregon's 2012 303(d) List.

<https://www.epa.gov/tmdl/partial-approvalpartial-disapproval-oregon-2012-303d-list>

This includes a request for public comment on Ocean Acidification Impacts in Oregon Marine Waters.

[https://www.epa.gov/sites/production/files/2016-12/documents/enclosure\\_2\\_epa\\_request\\_for\\_oa\\_public\\_comment.pdf](https://www.epa.gov/sites/production/files/2016-12/documents/enclosure_2_epa_request_for_oa_public_comment.pdf)

In this request, EPA states "EPA will evaluate any new data and information received and make an attainment determination as to whether Oregon's coastal waters are attaining applicable water quality standards", thus additional pteropod data would be useful for their decision making.

We also wanted to let you know that the first manuscript on our work in the Snohomish has been submitted to PNAS.

Hope all is well,  
Cheers,  
Cheryl
